The Burn tool will evenly lighten or darken an image. It works well for adding and removing highlights and shadows. Brushes A Photoshop brush has a brush tip and a width, height and size. Brushes are extremely useful, because they can be easily customised. For example, when you have a wide brush you can change it into a small brush by simply dragging the edges together. - The Brush Tool - Brushes Brushes are the bread and butter of any professional photoshop user, because of the sheer number of possibilities they offer. You can use brushes to apply effects like painting, stroking or gradient fills, to add texture, or to create digital watermarks. When you have used a brush correctly, you can see the effect you create quickly. For example, you can quickly trace the contours of an object. With the Paint Bucket Tool you can apply a color or a pattern from the image. You can also use the Eraser tool to remove objects from the image and the Gradient tool to change the color of an object. You will need to use these tools often when you are working with Photoshop. - Define the area you want to paint. - Paint brush - Paint bucket - Photoshop brushes - Blur filter Using Paint Bucket Tools - Use the Brush to paint to either add or erase the area you want to paint. - Define the area you want to paint. - Paint bucket - Photoshop brushes - Blur filter Using the Gradient Tool - Use the Gradient tool to create a fill gradient. - Fill gradient - Fire Pattern Using the Fire Pattern Tool - Use the Fire Pattern tool to create a fire pattern. - Fire pattern - Fire Using the Burn Tool - Use the Burn tool to remove certain parts of the image. - Remove objects - Remove unwanted objects - Fire - Fire Pattern Using the Gradient Picker Tool - Use the Gradient Picker Tool to navigate to specific values. - Gradient Picker - Contouring Using the Pencil Tool - Use the Pencil tool to paint specific shapes. - Paint with a shape - Outline Using the Sponge Tool - Use the Sponge tool to create a sponge effect. - Sponge Using the Clone Stamp Tool - Use the Clone Stamp tool to remove an object from another part of an image. - Remove objects - Remove unwanted objects

### What's New in the?

Photoshop Brushes The Brush Tool is one of the most important parts of Photoshop. It can be used for a variety of applications, including painting, cross-hatching, painting with geometry, and even digital art. You can use different brush types, including hard edges, soft edges, and pressure. The Brush Tool can be used to blend colors, create special effects like blurs, or even create textures. The Brush Tool can use different types of brushes: Click and Hold to change brush type: To change a brush type to a "selection" brush, click the cursor into a spot on your image, hold down the Shift key (make sure the cursor is in the right spot), and then click again. Click once in a spot and hold down the Alt (option) key to change the brush type to a regular brush. To change a regular brush to a "selection" brush, click once in a spot on your image, hold down the Shift key (make sure the cursor is in the right spot), and then click again. To change a brush type to a "selection" brush, click the cursor into a spot on your image, hold down the Shift key (make sure the cursor is in the right spot), and then click again. Double Click to reset a brush to its default settings: To reset a brush to its default settings, hold down the Ctrl (command) key, then click-and-drag on the image. Photoshop will then generate a brush with its default settings. If you click on a new spot after this, the original brush type should be the default. How to use a brush The Brush Tool can be used to edit or add an effect to your image. In this tutorial, you'll learn how to use a soft edge brush to create a gradient. There are two ways to use a brush: Using the Brush Tool, Selecting an area on your image and using the Eraser Tool. Using the Brush Tool Select a Brush Tool object. (It should already be selected if you're using the Default Brushes: Solid Ink and Gradient Ink.) Click to "activate" the brush, and then click your image (or use the keyboard shortcuts Alt (option) + LMB (left mouse button) + Click (or Alt + Click)). You can edit this brush in the Brush Settings dialog box (Window > Brushes > Brush Settings), which will appear
