This tiny little device will function as a modulated and encrypted dongle with a dongle emulator that needs to be turned on after installation and runs as an independent appliance. The WIBU-KEY works out of the box on all current and previous versions of Windows, Macintosh, Linux, Android, and numerous other OS's. All together it is a complete and full function keyguard/clone dongle and dongle emulator with a great deal of its functionality saved in the form of only 100 words of code and some superior sense programming.
